

Assigning Problems Using ASSISTments

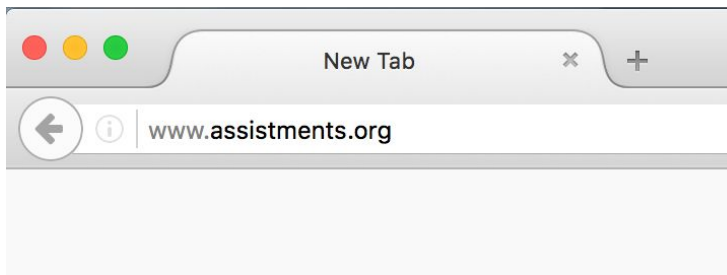

Assigning problems in ASSISTments is fairly simple. This step-by-step tutorial will show you how to assign a problem set in one of your classes in ASSISTments.

What you'll need:

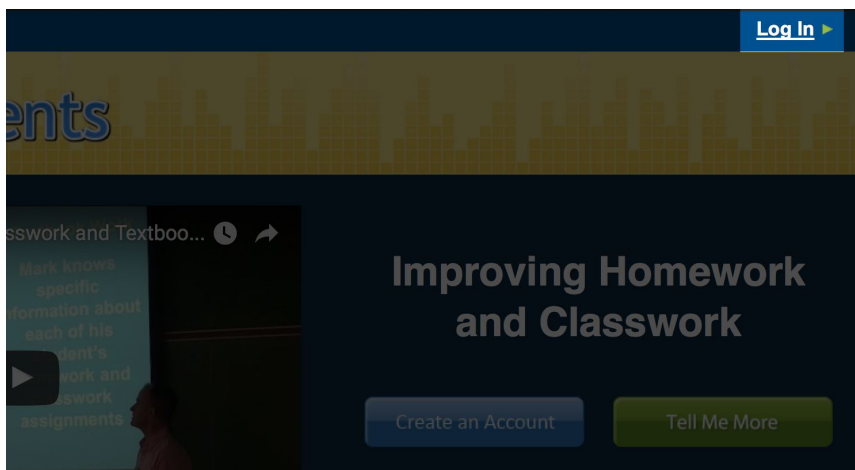

- an ASSISTments account
- a class in your ASSISTments account
- the desired problem set ID you want to assign

Instructions

- 1) Open your Internet browser and **go to assistments.org**

- 2) Click the link on the top right corner that says **Log In**. (If you don't have an account, click the Create Account button and follow the directions)

- 3) Enter your **login information** in the sign in form.

[Create an Account](#)

User Name or Email:

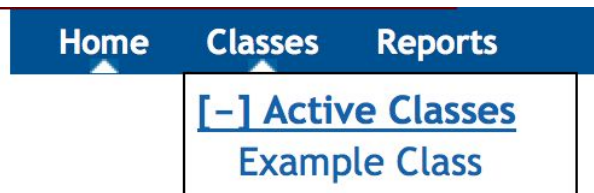

Password:

Remember me

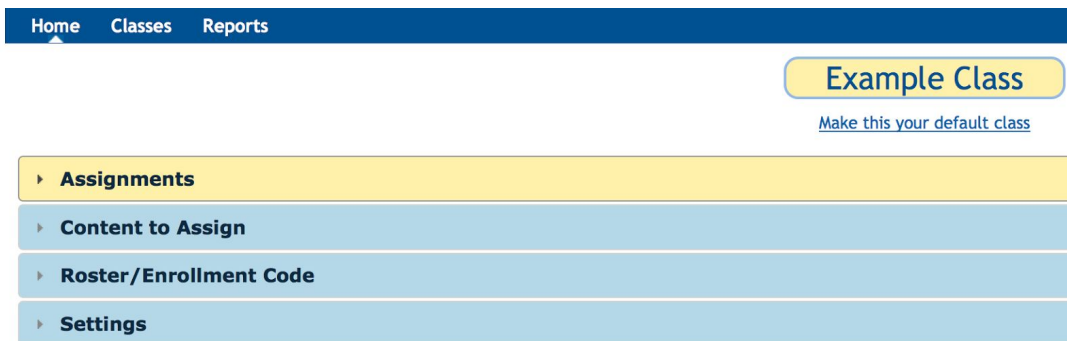

I forgot my [password](#)

For students: If you didn't provide an email address, your user name is (e.g. JohnMS0801)

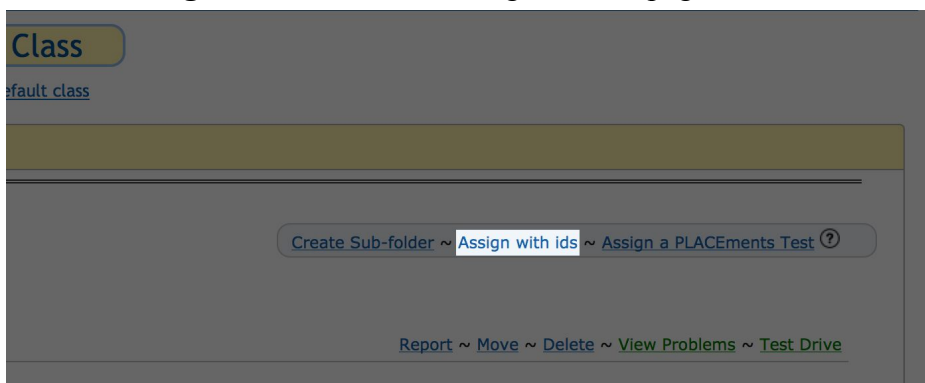

- 4) Under classes, select the desired **class** you want to assign the problem set

- 5) Click the **Assignments** tab to expand it

- 6) Click the **Assign with ids** link on the right side of page

- 7) Almost there! Enter the desired **Problem Set ID** in the form below, select your settings, and click **Assign**.

 [Assignments Folder](#)

Assign to : Assignments Folder

Problem Set IDs:

Assign to all students in this class.
 Assign to **current** students in a section.
 Assign to individual students in class.

Set a release date

Set a due date

Organize

Put this in My Favorites

- 8) Finished! As students complete the assignment, you can click on the **Report** link to view their progress.
